## Chapter 2 practice Test – (Be sure and show all work)

Numbers 7 and 8 would be calculator problems

1) For the following parts, state which relations are functions and which are not. Be sure and explain your answer.

a)

X	У
3	4
4	7
5	10
10	25

с.	(3, 2),	(5, 6),	(0,3),	(3,2)
----	---------	---------	--------	-------

d.

b).

X	У
3	4
3	7
6	10
12	25

2) State whether or not the following function is linear or not. Then evaluate f(3)

a) 
$$f(x) = 3x - 7$$
 b)  $f(x) = x^3 - x^2 + 2x + 4$ 

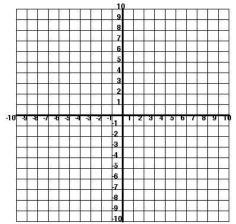

3) Find the equation of the line that goes through the points (-2, -6) and (6, 14)

4) Find the equation of the line that is perpendicular to your answer from question three and goes through the point (1, 1).

Algebra 2 Mr. Doherty

- 5) Find the equation of the line that is parallel to your answer from question three and goes through the point (1, 1).
- 6) Graph the equation  $y = \frac{1}{2}x + 3$ . Find the x and y intercepts and label them on

the graph. Also state the slope and y-intercept.

7) When I worked on the farm the amount of money I was paid was <u>directly related</u> to the amount of hours that I worked. One week I worked for 25 hours and I was paid \$206.25.

a) Find the constant of variation and form an equation, relating money to hours worked.

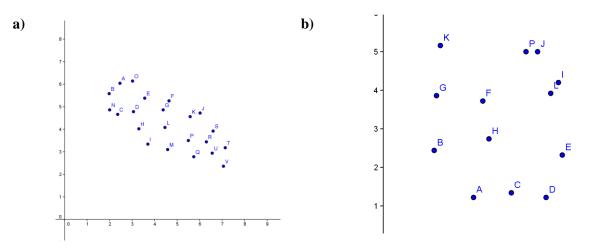

b) If I worked for 34 hours the next week how much money did I get paid?

- 8) The following table gives my bowling scores y on the first 5 weeks x of my bowling league.
  - a) Find the best-fitting line for the data.

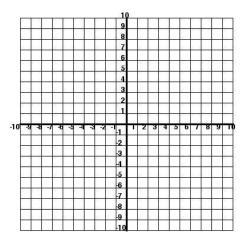

b) Predict what I will bowl on the 21<sup>st</sup> week.

X (Week)	Y(Score)
1	120
2	115
3	132
4	135
5	140

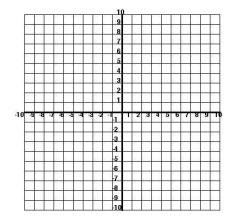

9) For each graph state whether the correlation appears to be negative, positive, or if there appears to be no correlations.

10) Graph the equation -4y + 3x > 2 in the coordinate plane below.

11) Graph the function f(x) = -1 |x-1| - 3 below, and explain all of the changes that happen if the original graph is g(x) = |x|.

12) Graph the function f(x) = |x+5|+2 below, and explain all of the changes that happen if the original graph is g(x) = |x|.

									10	Q									
									9										
				6					8
